

THIRD REPORT OF PROJECT: "PROVIDING SAFE WATER AND FOOD TO 5,953 CHILDREN"

The project "Provide safe water and food to 5953 children" aims to drill boreholes and produce vegetables through agroecological practices in 11 primary schools in rural areas. This is an opportunity to allow 5,953 students to have drinking water and healthy lunches.

The project's activities started on September 1, 2022 thanks to AFDD's own funds and grants from the Paris City Hall. The funding amounts to 11,000 euros, not enough to carry out the projects in all schools.

Schools in Yombo and Sekia-Dallet villages were trained in agroecology in November 2022 and received agricultural inputs (vegetable seeds, tools and other materials).

Regarding drinking water, only the Sekia-Dallet school has benefited from a water borehole.

On January to march 2023, three schools (Yombo, Sekia-Dalet and Nzilla sowed vegetables (see table below).

Donations are important to continue our project.

we need your donations

Thanks!

By Adèle Grembombo, President & Peggy Dangbo, Treasurer

Name of School	Kind of Vegetables	number of vegetable seed beds	Cultivated area (m ²)
NZILLA	Amaranth	7	84
	jute	6	72
	eggplant	4	48
	tomato	3	36
	carrot	2	24
	spinach	2	24
	okra	3	36
	cucumber	3	36
Total 1		30	360
SEKIA DALLET	okra	2	24
	eggplant	2	24
	amaranth	2	24
	jute	2	24
	carrot	1	12
	cabbage	1	12
Total 2		43	120
YOMBO	sorrel	2	24

	cabbage	3	36
	amaranth	4	48
	jute	2	24
	eggplant	1	12
	okra	2	24
Total 3		14	168
Total: 1 + 2 + 3		87	648
